## Quarterly Performance Attribution Summary

The Friess All Cap Concentrated Composite grew 15.45% in the three months through March versus a 8.63% gain in the Russell 3000 Growth Index. The composite portfolio outperformed the benchmark in seven out of the nine economic sectors represented in it during the March quarter.

Holdings from the technology sector, which comprised the largest portfolio position, were the biggest performance contributors. Semiconductor-related holdings, including Micron Technology and Advanced Micro Devices, drove the sector's advance. Consumer discretionary holdings, which represented the second largest position, were the next most significant contributors to March-quarter gains. Children's Place and Priceline Group were among the top performers. Avocado producer Calavo Growers declined amid trade tension with Mexico and heavy rain in California, making the consumer staples sector the biggest performance detractor.

## Important Disclosure Information

Performance data quoted represents past performance; past performance does not guarantee future results. Any sectors, industries, or securities discussed should not be perceived as investment recommendations. Any securities discussed may no longer be held in the portfolio. It should not be assumed that any of the securities transactions discussed were or will prove to be profitable, or that the investment recommendations we make in the future will be profitable. Each investor's portfolio is individually managed and may vary from the information shown in terms of portfolio holdings, characteristics and performance. Composite returns are gross of fees and do not reflect the deduction of management fees (1% of assets annually), and include the reinvestment of dividends and reflect brokerage costs. Assuming an initial \$10 million investment, over the three-year period shown above, an investor in the Composite would have paid approximately \$358,913 in management fees. The Russell 3000 Index measures the performance of the 3,000 largest U.S. companies based on total market capitalization, which represents approximately 98% of the investable U.S. equity market. The Russell 3000 Growth Index measures the performance of those Russell 3000 Index companies with higher price-to-book ratios and higher forecasted growth values. The stocks in this index are also members of either the Russell 1000 Growth or the Russell 2000 Growth indexes. Returns through March 31, 2017. \*The Composite's inception date is December 31, 2006.
